

LOGAN WATSON

Winneconne, WI | (920) 379-5628 | logan.ad.watson@outlook.com

GitHub: github.com/LoganWatson1400 | Portfolio: loganwatson1400.github.io

PROFESSIONAL SUMMARY

Recent Computer Science graduate from the University of Wisconsin-Milwaukee with hands-on experience in software development, machine learning, full-stack development, and collaborative technical projects. Earned Best Senior Design in Computer Science and Top-5 finishes in two corporate hackathons. Skilled in Python, C#, Java, JavaScript, SQL, and modern software development tools. Seeking an entry-level software engineering or software development role where strong programming, problem-solving, and collaborative skills can contribute to real-world applications.

EDUCATION

University of Wisconsin-Milwaukee | Milwaukee, WI

Bachelor of Science in Computer Science | May 2026

Selected Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Computer Cybersecurity, Algorithm Design & Analysis, Computer Architecture, Computer Graphics, Programming Languages

TECHNICAL SKILLS

Programming Languages: Python, C, C++, C#, Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Svelte, Django, Flask, TensorFlow, Keras, scikit-learn, NumPy, Pandas, jQuery

Development Tools & Platforms: Git/GitHub, Docker, Jira, Trello, PostgreSQL, SQLite, Windows, Linux/WSL

Game & Graphics Development: Unity, Godot, GLSL, procedural generation, shader programming, 2D/3D rendering, lighting models, texture mapping

Software Engineering: Object-Oriented Programming, Agile Development, RESTful Application Design, Test-Driven Development, Code Review, Pair Programming, Debugging, System Architecture, UI/UX Design

Machine Learning & Data: Computer Vision, Model Fine-Tuning, Statistical Analysis, Data Visualization, Optimization Algorithms, Search Strategies

Testing: JUnit, Python unittest, Catch2, Unit Testing, Integration Testing, Performance Testing, Fuzz Testing

Additional Tools: OpenCV, MATLAB, Blender, CAD, 3D Printing, 3D Scanning

SELECTED TECHNICAL PROJECTS

FlashCardRoguelike | Senior Capstone Project

Best Senior Design in Computer Science | Godot, C#

GitHub: github.com/LTEmmmer/Group13Capstone

- Collaborated on a six-person team to develop an award-winning educational roguelike game combining dungeon progression with adaptive flashcard learning mechanics.
- Engineered a scalable C# item and effect system using an extensible abstract-effect architecture, allowing flexible creation and implementation of game items.
- Conducted code reviews for approximately 50% of project pull requests, strengthening code consistency and maintainability across the application.
- Contributed to collaborative software development, system design, debugging, and implementation throughout the capstone lifecycle.

AI for Workplace Safety Hackathon | Brady Corporation

Top-5 Finish | Python, TensorFlow, OpenCV, scikit-learn

GitHub: github.com/LoganWatson1400/Brady_Hackathon

- Built a machine-learning mobile application designed to detect OSHA safety violations from workplace images.
- Led model development by fine-tuning a pretrained convolutional neural network and evaluating performance to improve accuracy and generalization.
- Used OpenCV, NumPy, and Pandas for image preprocessing and data augmentation and TensorFlow and scikit-learn for model training and evaluation.
- Deployed the model with TensorFlow Lite to support real-time, on-device inference.

Production-Line Optimization Hackathon | Kimberly-Clark

Top-5 Finish | Python, NumPy, TensorFlow, scikit-learn

GitHub: github.com/LoganWatson1400/KCO

- Developed a Python-based optimization solution with a two-person team to improve warehouse scheduling efficiency.
- Implemented a genetic algorithm to evaluate scheduling alternatives through iterative optimization.
- Applied NumPy, Matplotlib, and Plotly to analyze and visualize scheduling performance.
- Used TensorFlow and scikit-learn to support modeling and experimentation for a real-world production challenge.

Developer Portfolio

Svelte, JavaScript, JSON

Portfolio: loganwatson1400.github.io | GitHub: github.com/LoganWatson1400/portfolio_development

- Developed a responsive personal portfolio website featuring terminal-style navigation, continuous scrolling, and an interactive developer-focused interface.

- Built a modular command-based architecture and JSON-driven content system to support scalability and maintainability.
- Designed the site to showcase technical projects, experience, and professional information across devices.

PROFESSIONAL EXPERIENCE

Alliance | Ripon, WI

Line Assembler (Temporary) | June 2025 - August 2025

- Worked across multiple production stations in a fast-paced manufacturing environment while maintaining established quality and safety standards.
- Adapted quickly to changing assignments and assembly tasks to support production continuity and daily team goals.
- Collaborated with team members to meet production expectations in a high-volume manufacturing environment.

Mativ | Appleton, WI

Warehouse Associate (Temporary) | July 2024 - September 2024

- Operated material-handling equipment, including powered pallet jacks, to support efficient product movement within a high-volume warehouse.
- Collaborated with team members to meet shipping and production deadlines while maintaining safe work practices.

Arla Foods | Kaukauna, WI

Packaging Technician (Temporary) | June 2023 - September 2023

- Operated packaging equipment for cheese production in a manufacturing environment.
- Performed quality-control inspections to ensure accurate labeling, packaging, and compliance with production requirements.
- Collaborated with team members to identify and resolve production and packaging issues.

Lowe's | Oshkosh, WI

Sales Associate | May 2022 - September 2022

- Assisted customers with home-improvement product selection using product knowledge, active listening, and problem-solving skills.
- Supported sales opportunities by identifying customer needs and recommending appropriate products.
- Maintained organized merchandise areas and communicated store policies to support a positive customer experience.
